# About us

Our Blockchain as a service creates products for smart contracts and cryptocurrencies that allow businesses to build and test blockchain products, develop crypto solutions using Ripple as well as maintain interledger payment between blockchain networks. Blockchain increases trust, security, transparency, and the traceability of data shared across a business network — and delivers cost savings with new efficiencies. Blockchain for business uses a shared and immutable ledger that can only be accessed by members with permission.

# What is USDT

Tether (USDT) is a popular stable coin that crypto enthusiasts have used for years to leverage their cryptocurrency trades.

USDT is pegged to the U.S. dollar, and in theory it should be unaffected by the market volatility that can so dramatically impact the valuation of other crypto currencies, such as Bitcoin.

TETHER

# Vision and Mission

The entire premise behind Forex and the Trending was to create a universal, democratic system where everyone can participate without any restrictions. Decentralization ensures that no single person or an entity is entitled to control the ecosystem and from one side we see and accept the Progressive role of digital technologies in the modern world. From the other side we understand not everyone has access to it, looking into this scenario we decided to develop a unique ecosystem for everyone where a normal person can take the advantage of this digitalization to make his life better.
